EXAM REPORT

The HTML form in index.html was for front-end validation demo only. The live registration is handled by register.php which inserts into MySQL with status Pending for Farmers.

Passwords are never stored in plain text, they are hashed with bcrypt."

Role-Based Access Control (RBAC) implemented

WORD REPORT OUTLINE

1. Title Page

ShambaFresh: Online Fresh Produce Marketplace

Name: [Your Name] | Reg No: [Your Reg] | Course: [Your Course] | Date: Nov 20262. Introduction

ShambaFresh connects Kenyan farmers directly to buyers. Farmers register, Admin approves them, they list produce, buyers browse, add to cart, checkout via M-Pesa. Problem solved: Middlemen exploit farmers, buyers get stale produce at high prices.3. Objectives

Allow Farmer registration & Admin approvalAllow Farmer to add/manage produceAllow Buyer to browse, search, filter, add to cart, checkoutAllow Admin to manage Users, Produce, OrdersSecure login with hashed passwords4. System Design

ER Diagram: Users (1) —< Orders, Users (1) —< Produce, Orders (1) —< Order_ItemsTables: Users(user_id, full_name, email, password, role, status), Produce(produce_id, farmer_id, name, price, stock, status), Orders(order_id, buyer_id, total_amount, status, delivery_location, payment_method), CartTech: HTML/CSS/JS Frontend, PHP Backend, MySQL Database, XAMPP5. Implementation / Features (with Screenshots)

Paste your screenshots here in order:Homepage (index.html) with CartRegister Form → PendingLogin FormAdmin Dashboard - Approve FarmerFarmer Dashboard

- Add ProduceProduce List - Search/FilterCart Drawer - Add/RemoveCheckout - Order Placed SuccessfullyphpMyAdmin - Orders Table showing order6. Security (Task 8)

Password hashing with password_hash()Prepared statements to prevent SQL Injectionhtmlspecialchars() to prevent XSSSession + Role-Based Access Control (Admin / Farmer / Buyer)Deleted reset_admin.php after setup8. Challenges & Solutions

Challenge: "Connection has failed" → Solution: Fixed db.php, started MySQL in XAMPPChallenge: Checkout showing Not Found → Solution: Created checkout.php + added delivery_location columnChallenge: Cart not working → Solution: Used localStorage + checkout.php to save order to DB9. Conclusion & Future Work

System works fully. Future: M-Pesa API integration, SMS notifications, Delivery tracking, Mobile App.10. Appendix

Paste your db.php, register.php, checkout.php code.
